### **Salina Regional Recognized for Excellence with ACC Heart Failure Accreditation**

(June 22, 2022) – The American College of Cardiology (ACC) has recognized Salina Regional Health Center for its demonstrated expertise and commitment in treating patients with heart failure. The Heart Failure Accreditation earned this month was based on a rigorous onsite review of the staff’s ability to evaluate, diagnose and treat patients with heart failure through pre-hospital care, early stabilization, acute care, transitional care, clinical quality measures and more.

Heart failure is a chronic and progressive condition where the heart is unable to pump enough blood to meet the body’s needs for blood and oxygen. Hospitals that employ an evidence-based, protocol-driven and systematic approach to managing heart failure have been able to reduce time to treatment and are able to identify and predict high-risk patients while also reducing length-of-stay and hospital readmissions.

“Salina Regional Health Center has demonstrated its commitment to providing north central Kansas with excellent heart care,” said Deepak L. Bhatt, MD, MPH, FACC, chair of the ACC Accreditation Management Board. “ACC Accreditation Services is proud to award Salina Regional Health Center with Heart Failure Accreditation.”

“This new accreditation for heart failure, in addition to our accreditation as a Chest Pain Center with Percutaneous Coronary Intervention from the ACC, is a great example of our collaborative efforts to provide the highest quality of cardiac care for patients in our region,” said Joel Phelps, President/CEO at Salina Regional Health Center. “These efforts by our staff for enhancing our levels of care make a difference in the region. I’m so proud of all the members of our heart team including nurses, doctors, leadership and everyone who is involved in this program caring for our patients.”

Hospitals receiving Heart Failure Accreditation from the ACC must take part in a multi-faceted clinical process that involves: completing a gap analysis; examining variances of care, developing an action plan;

a rigorous onsite review; and monitoring for sustained success. Improved methods and strategies of caring for patients include streamlining processes, implementing guidelines and standards, and adopting best practices in the precise care of heart failure patients. Facilities that achieve accreditation meet or exceed an array of stringent criteria and have organized a team of doctors, nurses, clinicians and other administrative staff that earnestly support the efforts leading to better patient education, improved patient outcomes, and more effective and efficient disease control.

The ACC offers U.S. and international hospitals like Salina Regional access to a comprehensive suite of cardiac accreditation services designed to optimize patient outcomes and improve hospital financial performance. These services are focused on all aspects of cardiac care, including heart failure.

**About the American College of Cardiology**

The American College of Cardiology envisions a world where innovation and knowledge optimize cardiovascular care and outcomes. As the professional home for the entire cardiovascular care team, the mission of the College and its 54,000 members is to transform cardiovascular care and to improve heart health. The ACC bestows credentials upon cardiovascular professionals who meet stringent qualifications and leads in the formation of health policy, standards and guidelines. The College also provides professional medical education, disseminates cardiovascular research through its world-renowned *JACC Journals*, operates national registries to measure and improve care, and offers cardiovascular accreditation to hospitals and institutions.
